I am an English teacher and I need to know the difference between the two expressions "Agreed" and "Agreed with" when they are used in a contract. Are they the same? Do I use one of them or both? How would they be used? A: In contract law, they are used differently in that one indicates acceptance, the other indicates agreement. Agreement means basically that you are giving your word, in a contract, that you will do something. Acceptance means you're agreeing to accept something. One can accept a contract offer by signing and returning it to the proposer. A contract may be offered to a party and accepted by signing. See also: Q: Accessing the DOM of an iframe I need to access the DOM of an iframe (same domain). var iframe = document.getElementById("iframedom"); The iframe has some javascript events: The above method works fine if I have a browser with my site open. The problem is that the page will need to be accessed by a Google Chrome extension which runs with a different domain (different codebase). The extension has its own DOM so it works fine in that context. When I try to get the DOM of the iframe (the same domain) it doesn't seem to like the events on the iframe. A: The Google Chrome extension's page does not have the same origin as the iframe, so attempting to access the if
