AutoCAD is designed to work with other AutoCAD applications, including AutoCAD Architecture, AutoCAD Mechanical, AutoCAD Electrical, AutoCAD Sheetmetal, AutoCAD Structural, Auto

Life-cycle assessment of plant-based power source. The increasing requirement for sustainable energy has led to the increased usage of biomass energy to replace fossil fuels. To reduce the use of fossil fuels, plants have been an efficient source of energy for alternative fuel production. However, current research on energy efficiency has not yet considered the entire life cycle of each technology. In this study, the energy efficiency of plants was assessed using life cycle assessment (LCA), a bottom-up approach to quantify and compare the environmental impact of different plant-based energy production methods.
