Left And Right Mouse is a user-friendly tool that was developed in order to provide you with a quick means of swapping your mouse buttons. The application runs minimized in the system tray, so you can access it whenever you need. All you have to do is double-click the program icon and it will automatically switch your mouse buttons between themselves, allowing for the left to become right, and vice versa. In order to return to the former setting, you simply have to repeat the double-click action, and it is done. Left And Right Mouse can prove particularly useful for left-handed individuals who have a hard time adjusting to regular computer mice, but do not necessarily want to invest into a special device. Additionally, you might have more than one PC, and you cannot carry a mouse with you wherever you go. Left And Right Mouse also targets people who suffer from Repetitive Strain Injury, that causes constant pain to the afflicted body parts. A forceful or repetitive action, such as writing on your keyboard for long hours or sitting at your computer and typing in an uncomfortable position can lead to Repetitive Strain Injury on your wrists, making it difficult, if not impossible for you to continue to work. By switching your mouse buttons, Left And Right Mouse enables you work with both hands, alternately, so as to allow the other wrist to rest while you carry on with your work. Because it is a portable utility, you can take Left And Right Mouse with you wherever you go on a USB storage device, so you can use it at home, at work or anywhere else you need. In addition, it creates no registry entries on your system and you can remove it simply by deleting its containing folder. Left And Right Mouse is a useful and reliable application that can help you work more efficiently, prevent the appearance of RSI and allow left-handed individuals use the mouse properly.
