Manager - Document Management Software

MiniContractManager is a neat software solution that allows you to manage multiple contracts at the same time, it features contract life cycle management, configurable email templates and more tools. It's a neat software solution that allows you to manage multiple contracts at the same time, it features contract life cycle management, configurable email templates and more tools. Sleek and clean user interface The application doesn't take long to install and it doesn't come with a complicated setup that you would need to complete before you can actually use it. It sports a clean and simple user interface with many nice tools

at hand. Manage contracts easily It features contract life cycle management, configurable email templates, visual alerts when a contract is due for review, link multiple parties to contracts, assign administrators to contracts, link files to contracts and much more. When you first use Mini Contract Manager you will need to create a database to store the contract information. You can create a database on a local drive but if you are on a managed network it is better to create the data in a network location so it can be easily backed up. Multiple user access is supported. More features and tools You can manage contract administrators easily. A contract administrator is the person nominated to oversee the management of a contract. Depending on the contracts settings and details each contract will be allocated a status by Mini Contract Manager. It comes with multiple email templates that you can use. Associated documentation can be linked to each contract. Files such as contract details, document scans, correspondence, invoices and purchase orders will remain easy to track and associate with the relevant contract. All in all, Mini Contract Manager is a very useful software solution that allows you to manage multiple contracts at the same time, it features contract life cycle management, configurable email templates and more tools.
