I'm using a kind of cyclic approach and generate data in a list which I write into a text file every second. I have a class that handles the text file writing and the sensor reading. Now the issue that I have is that I'm getting an exception and I don't really understand why. I think that it has to do with thread.sleep(). Here is my code: public class SensorState extends Thread { List _SDataList = new ArrayList(); public String _fileName; public List _SDataListData; public SensorState(String fileName) { _fileName = fileName; _SDataListData = new ArrayList(); } public void run() { FileWriter fw = null; try { fw = new FileWriter(_fileName); writeList(); updateList(); } catch (IOException e) { e.printStackTrace();
