Desktops Software updates.Q: How to get the XSRF token before Laravel 5.2 I have upgraded to Laravel 5.2 and now I'm getting [BadMethodCallException] The service provider instance has no method named "make_token()". How can I get the XSRF token before in Laravel 5.2? I had a try to get the token using cookie() but is not working. A: You can get the XSRF token using Request::header()->get('X-Xsrftoken') Take a look in the ServiceProviders.php file of your app. CBS News medical contributor Dr.

I notice in the Fraps 3.4.0 comments that the modified installer is not working for some. Here's what I did in hopes that it might work: 1. Original Fraps folder was in my Documents folder. I copied it to my desktop. 2. I ran the modified version of Fraps from my desktop. 3. I ended up with a Fraps folder in my Documents folder, and a Fraps folder on my desktop. I can't get the original Fraps folder to open, and the modified Fraps folder doesn't open. Sorry for the bad news, but I don't know what else to try. thanks, G. Mcpeek RE: Fraps v3.4.0 (Full Registered Version) Download Fraps v3.4.0 (Full Registered Version) It's been over 2 days and the Fraps bug hasn't been fixed yet. I hope to hear the fix soon, but until then, I recommend installing the 3.3 version from this link: It's a link to the version with the fix that I used to fix another package. If you download 3.3, make sure to delete your current Fraps folder before installing the new 3.3 version. Thanks G. Mcpeek RE: Fraps v3.4.0 (Full Registered Version) Download Fraps v3.4.0 (Full Registered Version) I am following your instructions exactly. I used the steps on this page, step-by-step. It worked. Do I have to run the patched or modified version of Fraps? I
