To change the look of an image, try the Quick Mask feature. You can do most of the job in any tool, but the Quick Mask tool can be very useful. Just highlight the area you want to change and click and drag to cover the area with a solid dark color. Alternatively, you can paint over the highlighted area with an alpha channel color to create a pattern, or overlay it with another image. Keep in mind that Photoshop is a vector graphics program. You create digital images based on mathematical formulas. As a result, Photoshop's pixel-based editing system doesn't work when you want to create truly print-ready images. Instead, you need to work in a program such as Adobe Illustrator, CorelDRAW, or another vector editing program. When you print your digital work, Photoshop's powerful clipping path, masking, and transparency features are essential. Applying Photoshop's powerful editing and enhancement tools

- The History panel:** The History panel offers a way to track the past actions that you've performed. You can modify individual past actions, change the color of past actions, delete one of the past actions, and create a new past action.
- The Options bar:** The Options bar enables you to save and recall your settings. When you work with multiple images, you can save the settings to a preset. If you decide that you want to use a preset, just select the option from the pop-up menu that appears and click Save.

PREPARATION CORE INGREDIENTS TOP PICTURE: Edson Williams Faux fly fishing Edson Williams' stab at simulated fly fishing – particularly as a way to gain an edge during an expert fish-hooking competition – calls upon a visual familiarity with the tradition of "articulated" imagery in Western painting. "I felt like most of my peers used a language I was familiar with, which is photography," he says, referring to the discipline's centuries-old lineage as a visual art. "As an artist, I feel like the best way to learn a visual language is to use visual language. It's what I enjoy doing." The idea presented itself in a bumper-sticker, "Fly Fishing with Browns" – a reference to the omnipresent sporting apparel color, a nod to the early watercolorists, who looked to nature for their subjects, and a reference to his and family's fondness for the wading fish in their home, lakes and creeks in Georgia. "That's where I learned to fly fish. I would go with my family and fish the tiny rivers and creeks near our house. The closest place I could get to fly fishing would be Lake Lanier. On those occasions, I would watch my father, who was a master fly fisherman, and he would show me techniques," he says. "I told him I was thinking about doing a visualization about fly fishing, and he said, 'You do what you enjoy. You just do what makes you happy.'" Williams is known for his clever use of an intuitive computer-assisted composition process to generate his designs. Although this process involves a simple sketching of the image – an illustrator's default process of beginning and ending, and progressing, with an image in mind – it results in a full color image. In Williams' case, it's a finish-to-finish image, or so he says – after tracing his reference image onto a painted surface, the watercolor stage is complete, and the computer application determines how the colors and shapes of the elements are to be divided. "I really hate to do it the other way around," Williams says, "but sometimes I'm not satisfied with what the computer is giving me. I'd rather roll the dice and paint myself. I sketch, think about it, and then do the painting. With fly fishing, I start with the outline, and then I layer things

She Has Issues She Has Issues (sometimes stylized as She Has Issues, abbreviated SHHIs) was a Philippine feminist zine, published in 1983-1986 in Manila and 1990 in Germany. It was created by Japanese-Filipino designer Akiko Ito, who also published a magazine called The House of Akiko Ito. She Has Issues has been described as "a solid, hybrid style halfway between punk and illustrated culture. It often shows cartoons and comic strips, but it is peppered with tiny texts and thoughts, in the form of political slogans, interviews or diatribes. It is also a fashion mag, but with a critical feminist slant, and prints pictures of its contributors." In its first volume, she has issues dedicated to household and food waste, childcare, reproductive rights, the reproductive justice movement and Asian women. Since its first publication, she has issues have been on abortion, the status of feminism in Japan, non-violent, sexual freedom and feminism in the Philippines, the culture of office life, identity, identity politics and queer politics. I'm not sure if I need to use a loop in a different way, or use the checkboxes as array elements and uncheck them all at once. Oranges Apples Cherries
