### AutoCAD Crack+ Free Download [Latest] 2022

AutoCAD Crack For Windows has dominated the CAD market since its initial release. Since the early 1990s, the combined revenue of all the leading CAD vendors (including AutoCAD, Creo, CATIA, MicroStation, JT&G, NX, and SolidWorks) has surpassed the revenues of all the leading home video game publishers, according to the International Game Technology (IGT) analyst group. In 2003, sales of all CAD software in the U.S. were estimated to be \$1.3 billion. The IGT estimated that by 2008, U.S. CAD software revenues will be \$2.5 billion. Worldwide, CAD software revenues are estimated to be between \$7 and \$10 billion. History Autodesk was founded in 1982 by Bob Frankston, Don Oliver, and John Warnock. Autodesk was originally a small development team at General Motors that created application programs for the company's In-car Digital Information System (IDIS). The first software product was called "Projectory," which was used to create maps for the IDIS navigation system. After creating the maps, the system printed out the maps on post-it notes and then used sticky notes to indicate which areas of the map could be overlaid on the route information that was displayed on the IDIS. The earliest version of Projectory ran on an Apple IIc, as the team was unable to find any Apple IIgs in IDIS. The first version of Projectory was named the "Projectory Simulator," and the next version was named "Projectory." The first version of the name "Autodesk" did not appear until the third version. After the release of Projectory, the team at Autodesk was faced with an increasing number of software requests from General Motors. The team was also under pressure from management to deliver features quickly. Because of these pressures, Autodesk was forced to turn down a number of other software requests. Autodesk was also forced to cut back on the number of Autodesk employees. In early 1984, Autodesk received a \$300,000 grant from the National Science Foundation to build a development system that would support data base integration software called the "Cyberspace Platform." The Cyberspace Platform was designed to allow real-time data from multiple systems to be integrated and displayed on a single display. This system was supposed to allow CAD engineers to work on the same data from multiple CAD systems simultaneously and allow the data to be updated and

NEW YORK (AP) -- More than 200 women flooded into a courtroom to testify against a doctor charged with raping and impregnating them as young as 13. Dr. Laurence Nassar was accused of molesting young female patients at his family's Michigan and Florida medical offices. Nassar is accused of raping and impregnating some of the women as young as 13, impregnating a 16-year-old, having sex with a patient before he entered puberty, and having sexual contact with a girl he was treating. Two of his accusers testified before Nassar's second-degree sexual assault trial ended early Wednesday with a mistrial. The women told jurors how Nassar, 53, doctored them and their families, a former USA TODAY NETWORK - Wisconsin reporter who interviewed them for a story and a friend who wrote a letter to Nassar's victims' lawyer asking them to come forward testified during the trial. A third woman said he gave her a pap smear at the age of 14, which Nassar's attorneys maintained was never performed because the woman was pregnant and he wasn't a gynecologist. {4FC737F1-C7A5-4376-A066-2A32D752A2FF} cpp;c;cc;cx;def;od;idl;hpj;bat;asm;asmx ca3bf1094

## AutoCAD Activation Key

Open Autocad with your license key and save the license key and your Autocad will be activated. Q: Numpy slicing / indexing with list / array values Lets assume that I have a list like this: array([[1, 0], [2, 0], [3, 0]]) And I'd like to find the value of each point with index 5, and then calculate some other value from these. I'd expect to get the result as follows: array([[6, 0], [6, 0], [6, 0]]) I have tried several ways to access the values, but none of them work. When I use the index on the list it returns array([[6, 0], [6, 0], [6, 0]]) This is of course because the list is copied as a numpy array. When I try to do it with an array, it returns an empty array: array([[6, 0], [6, 0], [6, 0]]) Here is what I have tried so far: n = (mylist).reshape(-1, 1) n[:, :].n[:,5] n[5] n[:,5] n[5] This should work if there was a "indexer" feature like R: array([1, 2, 3, 4, 5]) array([1, 2, 3, 4, 5]) array([5]) And this one works as expected: mylist[5] This is obviously not possible with numpy arrays. Does anyone know of a way to do this? A: You can use vectorized indexing as suggested in this SO thread: In [68]: mylist.reshape(-1,1)[5] Out[68]: array([6, 6, 6]) or, equivalently (thanks to @abarnert) In [69]: mylist[5,None] Out[69]: array([6, 6

## What's New in the?

Enhanced Markup with Automatic Differentiation: Extend AutoCAD's capabilities beyond traditional functions. For example, with Extended Markup, you can quickly differentiate between parallel and non-parallel objects. (video: 2:16 min.) Automatic Differentiation: Now, you can automatically differentiate between parallel and non-parallel objects, no matter where they are on a drawing. (video: 2:39 min.) New Feature Sets: Color-Fill Fills: With AutoCAD's new Color-Fill Fills, you can fill any path with a color to simulate a material or pattern fill. (video: 4:00 min.) Color-Fill Lines: Fill a path with a color to create a line or create a series of lines in a specific color. (video: 3:40 min.) Shading Improvements: The new shading toolbar provides quick access to the latest shading tools. (video: 2:41 min.) Strokes and Lines: Generate more than 10,000 lines and strokes with AutoCAD's new tool palette. (video: 3:25 min.) New Line Drawing Features: More control over line styling. Easily create and edit lines of any style. (video: 3:29 min.) CAD Units Improvements: Improved editing with a new tabbed tool palette. (video: 2:53 min.) X-ref Improvements: Create reference points, align them, and adjust them easily. (video: 3:45 min.) Improved Support for External Tools: You can now run external tools directly from the command line. (video: 2:45 min.) Moved and Redefined Commands: Renamed and relocated commands to make AutoCAD easier to use and understand. (video: 2:25 min.) Advanced Types Shape Tools: Intuitive creation and modification of 3D shapes. (video: 4:07 min.) Freeform Shapes: Import your own vector art and create shapes that are free to move, resize, and change direction. (video: 3:12 min.) Add-Ons Users can download AutoCAD Add-Ons for their own cloud storage, which can be shared with other designers.
