HyperMotion technology also is at the heart of the Interactive Rewind: Rewind Tactics, which brings you special rewind features and the ability to reactivate the best decisions after you've made them. All of this, as you'd expect, comes with a focus on delivering the best options for both attack and defence. Standard Match Design The standard match play is different. You can now set specific formations, first touch controls and tactics for each match. The new approach to formational control in FIFA gives you more control, but also enables you to structure your game on the pitch on a tactical level. You can restructure your team for each match, but a standard starting XI ensures you're always well-placed for the most important moments on the pitch. So set your tactics and decide between a short, long or long-short game, depending on what's required for you. Performance Mode New in the Performance Mode is a new timeline that encompasses all of the key moments of a match. You can scroll through the timeline and replay anything that has happened since the start of the game. You can also track specific players' performance and rewind key moments and show the effects they had in real time. You can also control individual players and use visual feedback to see the effects they have on the scoreline. For the first time, you can also create a video summary of a game and share your conclusions with other players. A dynamic training environment allows you to set up team tactics and drills, enabling you to adapt to the opponent's strengths and weaknesses. Individual Performance Drills First person dribbling and intercepts are enhanced, and you'll be able to control individual players on the ball in your defensive and offensive roles. We've also added 'drill-based training' features that focus on individual performance, which can be adjusted by the coach and modified when your players' needs differ. Progressive Matches and Player Leveling Progressive Matches mean more and more challenges. At the start of the match you'll see the difficulty settings you'll be presented with as the challenge is increased. You can progress through the game's Progression Levels to get more and more difficult challenges, with the final level the highest level of the season.
