Q: How to create a small project with Android Studio? I know it's not normal to ask this question here (first time asking on SO), but I'm just curious to know if there is any way to create a small Android project, with a corresponding source code, in Android Studio, that can be used for debugging or for experimentation purposes. Is there something like that? Maybe a repo or a set of instructions? A: I think what you are asking for is how to set up a project, not how to create an experimental project. There are many ways to do this, but I will give you the steps for what I would use. First, select File > New > New Project: The next c6a93da74d
